

Tane calls Yotaka "Yukata" in Japanese, his name isn't a kanji when Tane talked and I translated Yukata first, but when I did the typesetting I completely forgot about this detail and only thought: "oh, I typed his name wrong", orz  
So just pointing it out that I will type Yotaka on this chapter...  
Since it is not a big deal, I won't redo the other ones because it will a pain to upload it again too heard, so please forgive me on this one, hehe
